

MY EXPERIENCE IN GERMANY

The first day we arrived we were welcomed by the Germans. After that we had some food and went to the Germans' home. We unpacked and went on a walk around the neighborhood. The next day we had a tour around the school. Then we learned a little and then we had a break. When we had our break we could go outside so we played some soccer. After that we had one more class and then we had lunch. And then we went for a walk to the weaving museum. And then we visited a church nearby. After that we went bowling with one of my friends. The next day we went to an island called Werder. It takes about ten minutes by bus to get there. It was very nice there. It had a cool windmill and lots of other stuff. The next day we went to the city nearby called Potsdam. We had a tour of the city. We went to a park that was very big. Then we had some free time in the city to buy something. Me and my friends bought pizza. They had very good pizza. Then the teacher bought us all ice cream. I had two ice creams because one of my friends didn't like it. Then we went home by tram. Then in the late afternoon me and my friend went swimming in the nearby river. The water was actually quite warm. The last day we had workshops we could pick between four workshops. Two for an hour and the other two for the next hour. I picked woodwork and ping pong. Then we had to say goodbye and we left. The ride took about six hours. I know very long. But overall it was worth it and it was fun in Germany! You don't get to be in another country in someone's family every day so I'm glad I got to go!
